Pinnacle Studio: Error on install "Setup will now abort installation."

- Pinnacle Studio

Error on install "Setup will now abort installation." or Download starts, but shortly after starting the download it fails with message 'check my internet connection...'

This error can be caused by several things, see the items below.

- The most simple reason for this error is accidently hitting the keyboard on installation. Install the software again to make sure this was not the case.
- Antivirus software can cause this error. If you have this Antivirus software please temporarily disable it during the installation.
- Try installing Pinnacle Studio using the installation file given in link below, go to the page and select your version of Pinnacle Studio there.
