

## **How to save files in higher resolution than 150dpi?**

- AfterShot

In order to be able to export using 300dpi you have to open the full export window by clicking “File > Export > Export” on the menu bar - <https://cl.ly/0ce47b02a53b> - then you can select the resolution - <https://cl.ly/1d1741804138>. Please notice that exporting with 300dpi is a Corel Vector PRO only feature.
