

Register WinZip software using a registration file

- WinZip
- WinZip Self-Extractor
- WinZip Courier
- WinZip Enterprise

Note: Each set of instructions below assumes you have installed the correct major version of the appropriate application. The instructions are specific to the latest versions, but will be similar for earlier versions. The license file for your application (WinZip.wzmul, WinZipEC.ecmul, or WinZipSE.semul) must be correct for the version installed. The license file for one major version (such as WinZip 26) will not register another major version (such as WinZip 27).

WinZip Registration Instructions

Customers who purchase a multi-user license will receive an email confirmation after purchasing a license containing both a link to the WinZip distribution file and a link to your unique WinZip.wzmul registration file. This file contains registration information and a link to the WinZip website, so you can view the number of licenses assigned. To register your copy of WinZip:

1. Download and install WinZip from the link provided in your order confirmation
 2. Download your unique registration file (WinZip.wzmul) from the link provided in your order confirmation
 3. Double-click the WinZip.wzmul file (or a shortcut to the file) to begin the registration process (WinZip MUST already be installed in order to register the product)
- Alternatively, you can drag and drop it onto an open WinZip window, or right-click it in a folder window and choose **Register WinZip**
Note: Dragging a WinZip.wzmul file onto an open WinZip window will not add the file to an archive, but instead will try to register the product.
 - Finally, you can manually place the WinZip.wzmul file in the WinZip subfolder in the Windows Common AppData folder. This folder contains application data for all users. A typical path for the WinZip.wzmul file is C:\ProgramData\WinZip. The presence of WinZip.wzmul in this folder will convert the evaluation version of WinZip to a registered version.
 - The next time you run WinZip, the registration reminder screen will not be displayed

To install and use WinZip in a network environment, click [here](#) for more information. The evaluation version of WinZip is available from the [WinZip Download Page](#)

WinZip Courier Registration Instructions

Customers who purchase a multi-user license will receive an email confirmation after purchasing a license. The email will contain a link to the WinZip Courier distribution file and a link to your unique WinZipEC.ecmul registration file. To register your copy of WinZip Courier:

1. Download and install WinZip Courier from the link provided in your order confirmation
 2. Download your unique registration file (WinZipEC.ecmul) from the link provided in your order confirmation
 3. Double-click the WinZipEC.ecmul file (or a shortcut to the file) and WinZip Courier will automatically be registered (WinZip Courier MUST already be installed in order to register the product)
- Alternatively, you can right-click the file in a folder window and choose **Register WinZip Courier** from the shortcut menu
 - Finally, you can manually place the WinZipEC.ecmul file in the WinZipEC subfolder in the Windows Common AppData folder. This folder contains application data for all users. A typical path for the WinZipEC.ecmul file is C:\ProgramData\WinZipEC. The presence of WinZipEC.ecmul in this folder will

convert the evaluation version of WinZip Courier to a registered version.

The evaluation version of WinZip Courier is available from the [WinZip Courier Download Page](#).

WinZip Self-Extractor Registration Instructions

If you purchase a multi-user license you will receive a confirmation email after purchasing a license containing both a link to the WinZip Self-Extractor distribution file and a link to your unique WinZipSE.semul registration file. To register your copy of WinZip Self-Extractor:

1. Download and install WinZip Self-Extractor from the link provided in your order confirmation.
 2. Download your unique registration file (WinZipSE.semul) from the link provided in your order confirmation.
 3. Double-click the WinZipSE.semul file (or a shortcut to the file) and WinZip Self-Extractor will automatically be registered (WinZip Self-Extractor MUST already be installed in order to register the product).
- Alternatively, you can right-click on WinZipSE.semul in Windows Explorer and choose **Register WinZip Self-Extractor**.
 - Finally, you can manually place the WinZipSE.semul file in the WinZipSE subfolder in the Windows Common App Data folder. The presence of WinZipSE.semul in this folder will convert the evaluation version of WinZip Self-Extractor to a registered version. However, if you are on Windows 98, the WinZipSE.semul file goes into the WinZip Self-Extractor folder.

Furthermore, WinZip Self-Extractor can be registered without the Graphical User Interface (GUI) for the multi-user version by following the below step:

- WinZipSE.semul file can be placed in the WinZipSE subfolder of the Windows Common App Data folder (normally, C:\ProgramData) and the WinZip Self-Extractor product will operate as licensed.

The evaluation version of WinZip Self-Extractor is available from the [WinZip Self-Extractor Download Page](#).
