

Studio 11 and 12 Hardware Compatibility List

- Corel Other

Hardware	XP	Vista 32 bit	Vista 64 bit
DV Camcorder - OHCI 1394	Yes	Yes	Yes
500 USB	Yes	Yes	Yes**
510 USB	Yes	Yes	Yes**
700 USB	Yes	Yes	Yes**
710 USB	Yes	Yes	Yes**
Moviebox Deluxe	Yes	Yes	Yes**
Moviebox DV	Yes	Yes	No
Moviebox USB	Yes	No	No
AV/DV	Yes	Yes	Yes
AV/DV Deluxe 1* Studio 11 ONLY	Yes	No	No
AV/DV Deluxe 2*	Yes	Yes	Yes
500 PCI	Yes	Yes	Yes
700 PCI	Yes	Yes	Yes
DVC 80	Yes	No	No
DVC 85	Yes	Yes	No
DVC 90	Yes	Yes	No
DVC 100	Yes	Yes	No
DVC 120	Yes	No	No
DVC 130	Yes	Yes	No
DVC 150	Yes	No	No
DVC 150B	Yes	No	No
DVC 170	Yes	Yes	No
DC10	Yes	No	No

Note: The AV/DV Deluxe 1 hardware is not supported in Studio 12.

- AV/DV Deluxe 1 & 2: If the connector closest to the side with the retaining screw on the Studio Deluxe bracket connects to the blue box (bottom connector is the 1394 port), then you have the AV/DV Deluxe 2. If you see you have a reversed bracket layout, in which the side closest to the retaining screw is a 1394 connector (bottom connector is the blue box connector), then you have the older AV/DV Deluxe 1.
- 64 bit drivers for these devices will be available via a PCLEUSB2 updater download as well as through Windows Update.

Note 1: Pinnacle capture hardware has not been tested extensively under Windows XP 64 bit. We cannot guarantee compatibility or support the hardware in that environment.

Note 2: The PCTV hardware family has not been tested in Studio 11 or 12 and therefore is not supported. We recommend capturing video in the application that came with the PCTV hardware then importing the captured files into Studio 11.

Note 3: The AV/DV deluxe 1 has not been tested on Studio 11 or 12 and therefore is not supported. Drivers for supported capture hardware can be found here:
