

Runtime Errors while launching Cineplayer 3.2 with Easy Media Creator 8 installed

- Roxio Legacy

This is because Easy Media Creator 8 has Cineplayer 2.3 bundled with it and was released prior to Cineplayer 3.2. When installed over 3.2, this will cause various conflicts.

To solve, remove both Easy Media Creator 8 and Cineplayer 3.2. Then reinstall Easy Media Creator 8 first followed by Cineplayer 3.2.
