

Installing Toast Titanium

- Roxio Legacy

NOTE to Toast 8 & 9 Titanium users:

The Toast 8 & 9 Upgrade version requires a prior version of Toast 7 Titanium, Jam 6, or Popcorn 2.

1. If you have the prior version of Toast 7 Titanium, Jam 6, or Popcorn 2 installed on your hard drive, the Setup Assistant of Toast 8 will ask for the Toast 8 CD-key directly.
2. If you don't have the prior version of Toast 7 Titanium, Jam 6, or Popcorn 2 installed on your hard drive, the Setup Assistant of Toast 8 will ask for an eligible prior version product key (Toast 7 Titanium, Jam 6 or Popcorn) before it asks for the Toast 8 CD Key.

To Install Toast Titanium:

1. Insert the Toast disc into your drive. If you purchased and downloaded the software directly from Roxio, double-click on the file you downloaded. The *Toast Titanium* window appears on your desktop.
2. Drag the **Toast Titanium** folder to the Applications folder on your hard disk.
3. In the new location on your hard disk (**Applications** folder), open the **Toast Titanium** folder and double-click the **Toast Titanium** icon to launch Toast.
4. Follow the on-screen instructions to set up Toast for the first time.

You will be asked to enter a CD key and accept the license agreement.
