

How to create slow and fast motion effect in VideoWave

- Creator NXT

1. Launch Easy Media Creator. Click on **Start** -> **All Programs** -> **Roxio Easy Media Creator** -> **Home**.
2. Under **Home** tab, click **Applications** then select **VideoWave**.
3. Add video file(s) into your project.
4. Double click on the movie in the Production Editor.
5. Under *Speed*, click the - (minus) for slow motion and + (plus) for fast motion effect.
