

DVD playback is choppy in Cineplayer

- Corel Other

The minimum tested CPU speed is 466 Mhz. To get maximum CPU performance keep other applications closed when viewing a DVD.

1. Make sure you have [[../marketplace.xbox.com/en-US/PC.html|Direct X 9]] installed, and are running the latest [[../windows.microsoft.com/en-US/windows/products/windows-media.html|Windows Media Player]].
 2. Download the latest certified video card drivers from your video card manufacturer's website.
 - Go to **My Computer** and right click
 - Choose **Properties**
 - Click on the **Hardware** tab
 - Select **Device Manager**
 - Double-click **Display Adapters**.
 - You're video card make and model is displayed.
 - To find out the driver details (such as version), right click on the make and model under **Display adapter**, and select **Properties**.
- Set your screen resolution to 1024x768, 16 color bit, and a 75 Hz refresh rate.
