

Can I edit my MyDVD projects in DVDit

- Corel Other

DVDit! 5 and 6 has the ability to open projects created in MyDVD (version 5 and higher).

To do this, just select **File -->Open**. Then select **Sonic DVD Project** from the **Files of Type** pulldown at the bottom of the **Open File** window. This will enable DVDit! to recognize MyDVD projects.

Once a MyDVD project has been selected, it can be edited and adjusted as DVDit! project.
