

## **Not enough permission to access the content message when trying to access Toast 11**

- Toast

A utility has been created to resolve this issue [here](#).

You can also manually change the permissions for the *Toast 11 Titanium* folder within the *Applications* folder, and then the *Toast Menu Styles* folder at `/Library/Application Support/Roxio` following the steps below:

1. Right click on the *Toast 11* folder and click on **Get info**.
2. Click on the **Padlock** icon at the bottom and entered the password then press **OK**.
3. Under the *Sharing and Permission*, change the privilege option for *Everyone* from **No Access** to **Read & Write**.
