

Snow Leopard Compatibility with Roxio products

- Toast

Roxio has identified minor compatibility issues between Snow Leopard and our current Toast and Popcorn products. Users who upgrade to Mac OS X 10.6 will be unable to launch TiVo Transfer, part of our TiVoToGo for the Mac solution. In conjunction with TiVo , Roxio has made available an updated TiVo Transfer application. This is available to registered users of a current Toast or Popcorn release and is compatible with the latest operating system from Apple.
