

## **Migrating QuickCorrect? List to current version of WordPerfect®**

- WordPerfect Office Suite

How to migrate the QuickCorrect™ list from previous WordPerfect® versions to your current version of WordPerfect.

### **Locate the QuickCorrect Files**

The WordPerfect QuickCorrect file is stored in a WordPerfect User Word List file format (UWL). The Default locations for the WordPerfect QuickCorrect files are listed below. The file will be called WT17XX.UWL, where XX is the language (US for American English, example: WT17US.UWL)

## **Moving the QuickCorrect to New Location**

One will need to copy the UWL file from the previous folder to the new. At the same, if the QuickCorrect file is for a different version of WordPerfect, one will need to change the number of the file name.

If going from WordPerfect 12 to WordPerfect X5, the file will need to be renamed from "WT12US.UWL" to "WT15US.UWL"
