

Painter 2015: Color panel doesnt save between workspaces and close or relaunch of the application

• Painter

Description of problem:

- 1. Create new workspace
- 2. Click on clone color icon in color panel
- 3. Back to default worksapce
- 4. Back to created worksapce

Workaround:

Press the 'clone color' button in the color panel one ore two times to re?sync the button with the brush. Do a brush stroke to confirm.
