

Painter 2018: Painter 2018: Custom brushes not working and/or are unstable

- Painter

Issue: Selection method is broken when converting any brush to a selection brush on General panel

Workaround:

1. Select the Paint brush you want to convert to a Selection brush
2. Change the method to selection, and choose the selection subcategory you wish
3. Change the stroke type to something different.
4. Change the stroke type BACK to the dab type you originally had
5. Save the brush.

Issue: Brush paints with black color when Selection method selected

Workaround:

Selection method starts working again when:

- switch between tools on the toolbar and back to Brush tool
 - switching back and forth between documents
-
