

Painter 2015: Canvas Size Values are cutoff in Canvas

- Painter

Description of problem:

1. Starting with a document 1600 x 900
2. Canvas > Canvas Size
3. Type in ""5000"" into the ""Add to top"" (value must exceed 3 digits)

Result:

It looks like the value goes from 500 to 0

But after clicking OK, it does add 5000px

NOTE: Painter X3 always shows the entered value when they exceed 3 digits

Workaround:

Entering in more than 4 digits in the Canvas Size dialogue may appear as only 3

Clicking OK will make all 4 digits appear correctly.
