

CorelDRAW: How to manually install CorelDRAW extensions

- CorelDRAW Standard

The Upgrade Program for CorelDRAW Graphics Suite now includes two powerful extensions. If you don't have them installed you can follow these instructions to manually install them.

Installation instructions

Download the files provided to you in your order confirmation email or by a Corel support specialist.

Copy the file from download location to:

C:\Users\<username>\Documents\Corel\Corel Content\Extensions

You may need to restart CorelDRAW Graphics Suite if you have it running already.

Where to find your new extension when they are installed

To use PhotoCocktail:

Open CorelDraw

Start a new Document

You will find PhotoCocktail in the top menu - Effects > PhotoCocktail

Check out this [tutorial on the Discovery Center](#) (English)

To use Fit Objects to Path:

Open CorelDraw

Start a new Document

You will find Fit Objects to Path in the top menu - Object > Fit Objects to Path

Check out this [tutorial on the Discovery Center](#) (English)
