

CorelDRAW 2018: When Project Timer disable, opening a file with data, then opening Project Timer, cause data not to show

- CorelDRAW Standard

When Project Timer disable, opening a file with data, then opening Project Timer, cause data not to show

In order to see your Project Timer information when working in CorelDRAW, make sure the Project Timer toolbar is open before opening files that contain Project Timer data.

To open the Project Timer toolbar, choose Window menu, Toolbars> Project Timer.
