

CorelDRAW - Access to Flickr is no longer available

- CorelDRAW Standard

You may have noticed that Flickr content is no longer accessible from older versions of Corel CONNECT.

The issue is caused by updates made to Flickr's automation programming interface (API). We have integrated those Flickr updates in recent versions of CorelDRAW Graphics Suite.

To regain access to Flickr content, please update your product to CorelDRAW Graphics Suite X7.2.

For more information about CorelDRAW Graphics Suite X7, click [here](#).
