

VideoStudio - Cleanup Tools for difficult uninstalls

- VideoStudio

When uninstalling VideoStudio, it is advised to first use Programs and Features (Apps and Features).

However in some cases that may not work, or be insufficient. In that case, you may need to use a special clean-up tool that will remove the VideoStudio and all its remnants from your PC.

Each VideoStudio version comes with its own version of the cleanup tool.

Please use the links below to download the respective version.
