

Issue: Perfect Authority causes format change after "Create Table at Cursor"

- WordPerfect Office Suite

Symptoms:

Tables created using Perfect Authorities "Create Table at Cursor" button may change formatting after the Table of Authorities in the document.

Cause:

The Left Margin Adjust value is altered.

Resolution / Workaround:

Check the Left Margin Adjust setting before the TOA, then set that value after the TOA:

1. Click just before the TOA
 2. Click Format, Paragraph, Format. Note the Left Margin Adjustment. Close the dialog.
 3. Create the TOA or, if it's already created, click at the start of the text just after the TOA.
 4. Click Format, Paragraph, Format. Set the value you noted in step 2.
