

CorelDRAW on Windows disappearing on application start

- CorelDRAW Technical Suite
- CorelDRAW Graphics Suite

Important Update

The issue with the CorelDRAW crash was addressed by the product update released on August 2nd, 2023. The fix is also included in the latest 2023 releases and above.

If your installation is configured to accept automatic updates (which is the default setting), you'll receive the update, and it'll be installed silently in the background.

To download the update manually, use the respective links below:

NOTE: Before installing the update, save your work and close the CorelDRAW application.
