

How to select multiple elements in an EPS that have masks?

- Gravit Designer Desktop App

Here's an example: <https://cl.ly/d19a6c89265a>. If you want to select all parts of this icon, you need to hold Shift + Ctrl/Cmd and click until all elements are selected. Only then you can move the entire logo. To simplify things after that, you can create a group of all selected elements with Ctrl/Cmd + G, which allows you to move everything together.
