

How to enable third-party cookies

- Gravit Designer Desktop App

Google Chrome

1. Open the menu on the top right (three vertical dots) and select **Settings**. This will open Chrome Settings page.
1. Select **Privacy and Security** from the left-side navigation.
1. Select **Site Settings** in the center section
1. On the Site Settings screen, scroll down to **Cookies and site data** section and click on it.
1. Make sure that the **Block third-party cookies** setting is turned **off**

Mozilla Firefox

1. Open the menu on the top right (three horizontal lines) and select **Options**. This will open Firefox Options page.
1. Select **Privacy & Security** from the left-side navigation.
1. On the Browser Privacy screen, select the **Custom** option. Uncheck the checkbox next to **Cookies**

Microsoft Edge

1. Open the menu on the top right (three horizontal dots) and select **Settings**. This will open Edge Settings page.
1. Select **Cookies and site permissions** from the left-side navigation.
1. Click on the **Manage and delete cookies and site data**
1. Uncheck **Block third-party cookies**

Apple Safari

1. Open the **Safari** menu from top-left corner and select **Preferences**
 1. Go to the **Privacy** Tab and uncheck "**Prevent cross-site tracking**"
