# I?m trying to export my file and it?s stuck on the ?Exporting? screen. What do I do?

- Gravit Designer Desktop App

If you are using the Edge browser, it doesn?t support the export feature at the moment, so it would be better to switch to Chrome or Firefox. And if this persists, even using other browsers, please send us the .gvdesign file and more details via https://support.gravit.io/hc/en-us/requests/new.
