

Where is the retina checkbox from export dialog gone?

- Gravit Designer Desktop App

The check was removed. Please use **2x** in the size drop-down for the exact same result. Retina label is misleading since even Apple devices have evolved and have a different resolution now (up to 3x) and Android devices have even more (up to 4x). You can [read more here](#) (Apple) and [here](#) (Android)
