

How to find latest builds of perpetual versions of WinZip?

- WinZip
- WinZip Courier

We recommend using the latest build of WinZip since it makes it easier than ever to work with Zip files (.zip or .zipx) and other popular archive formats (including .rar, .7z, bz2, and many others).

For more details and other new features, please visit the [WinZip](#) product page.

If you are registered for an earlier major version of WinZip and would rather not upgrade to WinZip 25.0 at this time you can download and install the latest build of your version of WinZip from the [Alternative Download Links](#) page. A link to [Legacy Download Links](#) near the bottom of this page is available for even older versions.

The files you download from these two pages will install the latest build for each WinZip version. Earlier builds are not distributed as the latest builds will include operational fixes and/or security fixes for the earlier builds. You can check what build you have installed in the [About WinZip](#) dialog. For your reference, the latest build numbers for each version of WinZip, WinZip for Mac, and WinZip Courier are listed below.

WinZip (for PC)		WinZip (for Mac)		WinZip Courier	
Version	Build	Version	Build	Version	Build
28.0	15620	-	-	12	76.5/28
27.0	15240	10.0	6204	11	14450
26.0	14610	9.0	5520	10	14090
25.0	14245	8.0	5151	9.5	13555
24.0	13618	7.0	4564	8.0	12599
23.0	13431	6.5	4149	7.0	12242
22.5	13114	5.0	3160	6.5	11568
21.5	12480	4.0	2519	5.0	10661
20.5	12118	3.1	2216	4.5	10424
19.5	11532	2.0	2044	3.5	9658
18.5	11111	1.5	0475	2.0	7688
17.5	10562	NA	NA	1.0	6415
16.5	10096	NA	NA	NA	NA
15.5	9580	NA	NA	NA	NA
14.5	9096	NA	NA	NA	NA
12.1	8519	NA	NA	NA	NA
11.20	8261	NA	NA	NA	NA
10.0	7245	NA	NA	NA	NA
9.0 SR-1	6224	NA	NA	NA	NA

Notes:

- Only the latest builds are distributed.
 - A registration issued for an earlier build of a version will work with the latest build of that major version.
Example: A WinZip 22.0 registration **will** work with WinZip 22.5.
 - Registrations issued for an earlier major version will **not** work in a later major version.
Example: WinZip 25 registration code will not register WinZip 26 or WinZip 27.
 - **Exception:** WinZip 9.0 SR-1 can be used with any registration prior to and up to WinZip 9.
