System requirements for WinZip Self-Extractor 4.0

- WinZip Self-Extractor

Supported operating systems

WinZip Self-Extractor 4.0 supports Microsoft Windows 11, Windows 10, Windows 8, Windows 7, Windows Vista, and Windows XP.

Extraction limitations

WinZip Self-Extractor 4.0 cannot create self-extracting Zip files from Zip files that contain:

- bzip2 compression
- xz compression
- mp3 compression
- Zip64 extended Zip file format
    - ♦ Files in the Zip file that were larger than 4gb (pre-zipped)
    - ♦ Zip files themselves that are greater than 4gb in size
    - ♦ Zip files that contain more than 65,535 files
- Windows does not support (is unable to use) executable files larger than 2gb.
- WinZip Self-Extractor 4.0 supports custom icons, as listed in the chart below.

Technical details: WinZip Self-Extractor will copy the pixel images from the specified icon file.

Supported formats

Pixel Size	Color Depth
16x16	4-bit
	8-bit
	32-bit alpha-blended
32x32	4-bit
	8-bit
	32-bit alpha-blended
48x48	4-bit
	8-bit
	32-bit alpha-blended
96x96	32-bit alpha-blended
128x128	32-bit alpha-blended
256x256	32-bit alpha-blended

Note: When Self-Extractor is run under Windows XP or Windows Server 2003, the last 3 icon formats are not supported.
Make sure that the icon images you include in your icon file conform to the image sizes and color densities specified above. Non-conforming icons files will be ignored and WinZip Self-Extractor will provide a default set of icons.
