

How to disable "Check for Updates"

- WinZip
- WinZip Enterprise

The **Check for Updates** feature can be disabled in the Registry Editor. You can do it this way:

1. Open Registry Editor.
2. Go to HKEY_CURRENT_USER\Software\Nico Mak Computing\WinZip\UpdateCheck.
3. Change the registry string value **NoUpdateChecking** from **0** to **1** and save it.

If the same string value change is made in **HKEY_LOCAL_MACHINE** it will propagate to any new user profiles that may be later added to the same computer.
