Content availability in various Studio versions

- Pinnacle Legacy

The chart below shows what content is usable with the various Studio versions. To use the chart, find the Studio version that you own on the top row. Be sure to note the versions of Windows that this product supports, this is listed below the product name. Next, findthe desired content in the first column. You can then verify if the content works with the specific Studio version by checking if there is a ***?*** in the row for the Studio version you are interested in.

- If the cell has an X in it, this means that the content will not work in the specific version of Studio.
- If the cell has ?FAQ? in it. Click the link in these cells for more information on this content.
- If the cell has a ***?*** in it, this means that the content will work. To get the content to work, see these FAQs for further instruction:

Will my previously purchased content work in Studio 12?
Will my previously purchased content work in Studio 14?
Will my previously purchased content work in Studio 15?
