

How to export an audio only file

- Pinnacle Legacy

Studio 12 and higher has the option to output to an audio only file. Here is how to output an audio file:

1. Go to the Make Movie tab
2. Select the File button on the left of the screen.
3. Select Audio as the File Type.
4. Select the desired preset. The following three presets are available:

- MP3 Stereo 44kHz
- WAV (PCM) Stereo 44kHz
- WAV (PCM) Stereo 48kHz

1. Click the Create file button
2. You will be prompted to choose the location for the file and to give it a name. Do this and click OK.
3. The creation process will begin and the file will be created.
