Magic Bullet Looks seems to be running slowly - How can I speed things up to get real time performance

- Pinnacle Legacy

In most cases, slow performance is due to the fact that you are not using a supported graphics card. Please review the list below to see which graphics cards we recommend:

- Nvidia 6600, 7800, 8800
- ATI 9600, 1800, 1900
- Note: there is no Intel card support
