

Some 3rd party plugins from my previous Studio Ultimate versions are not available in Studio

- Pinnacle Legacy

3rd party plugins from the Ultimate plugin discs are for use with the version of Studio in which they were purchased. Studio versions 11 and greater can all be installed side by side. Because of this you can leave the previous Studio version installed and still have access to the 3rd party plugin(s) in the version of Studio in which it was purchased.

If you are having difficulty getting Bonus DVD plugins installed in Studio 14 please see this FAQ:

[Bonus Content DVD is missing from Studio 14](#)
