

I get a license error, error reading software license information, upon launching Studio

- Pinnacle Studio

IMPORTANT: This fix is only for customers that get the specific error: "error reading software license information" when launching Studio.

1. Download the regfix2.zip file to a location you will remember, like your desktop.
2. Unzip the file using Winzip. If you do not have Winzip on your computer you can download it for free from: <http://www.winzip.com/>
3. When you unzip the RegFix2.zip file you will have a file called regfix.reg
4. Double-click on this file to add it to the registry.
5. Studio 8 will now launch without the error message.
