

Pinnacle Studio: How to unlock the Video Overlays purchased from Corel Discovery Center

- Pinnacle Studio

I have purchased Video Overlays from Corel Discovery Center but when I import them in Pinnacle Studio, all imported video overlays have lock sign on them. How to unlock these video overlays?

Video Overlays are CFHD encoded (GoPro CineForm) files. CineForm format files are supported in Pinnacle Studio 23 Ultimate or higher version.

You need to upgrade your Pinnacle Studio Standard/Plus version to Ultimate version in order to use the video overlays. You can find the same information on contents purchase page also; see the screenshot below.
