Pinnacle Studio 24: NewBlue FX effects support

- Pinnacle Studio

Installing Pinnacle Studio 24 on a system where Pinnacle Studio 22 is already present, Pinnacle Studio 24 shows NewBlue FX effects with watermarks.

NewBlue FX effects are not bundled with Pinnacle Studio 24. Importing NewBlue FX effects from Pinnacle Studio 22 and earlier versions are not officially supported, and there might be watermarks on NewBlue FX effects.

NOTE: If user has Pinnacle Studio 23 Ultimate installed in the system then the Pinnacle Studio 24 installer will pick up NewBlue FX from there and display for use in Pinnacle Studio 24.
