

RedGiant Plug-ins are not available within Studio 18 unless Studio 17 is already installed.

- Pinnacle Studio

Applies to: Studio Ultimate and RedGiant

Problem: RedGiant Plug-ins from Studio 17 are installed on the machine, but Studio 18 doesn't display them.

Solution: If Studio 17 is installed after Studio 18, then Studio 18 won't be able to display the RedGiant Plug-ins. In order for the RedGiant plugins to be usable in Studio 18, Studio 17 including RedGiant, must be existing on the PC before Studio 18 is installed.
