

Can't maximize Instant DVD Recorder to run full screen

• Pinnacle Studio

This is normal. Instant DVD Recorder, when ?maximized,? will display in a window that is 800×600 . If you are running a physical screen resolution larger then 800×600 , such as 1280×1024 , 1600×1200 , etc., then the Instant DVD Recorder software, when maximized, will be centered in the middle of the screen in a windows that is 800×600 .
