No DVD music album or AC3 in Toast 6

- Roxio Legacy

DVD Music Album and Dolby Digital encoding are Toast with Jam 6 features. In order to use these features, you must install and setup both Toast 6 and Jam 6. If you already own Toast 6, you can purchase an upgrade to the full Toast with Jam

6.

If you have Toast already installed on your system, FIRST make sure to update it to the version that came with your Toast with Jam 6 disc or electronic download (Toast 6 Titanium v6.0.4 or later). Then install and setup Jam 6.

Install and setup Jam 6:

1. Double click the Jam 6 application to start the Jam Setup Assistant
2. Follow the instructions and enter your Jam 6 CD Key
3. Close Jam and launch Toast 6 Titanium

The DVD Music Album and Dolby Digital encoding options will now be available.
