

Unable to connect to Streamer Server

- Roxio Legacy

Try the following resolution:

?

- Make sure your Streamer application is running and the Streamer Server has started steaming.

1. Launch Streamer.
2. Click on **Start Streaming**.

?

- Check to make sure you have entered the correct URL.

1. Go to **Streamer -> Preferences**.
2. Type the URL exactly as shown under *Your Streamer Server Address*.

?

- In your router, enable UPnP/NAT-PMP to open port automatically or manually forward port 10080 to your local machine. Please check your router's manual for instructions on how to configure port forwarding.
