

There is not enough space on this disc when burning DVD

- Creator NXT

The work around for this is:

1. Save your Project as a Dual-Layer DVD disc image file
 - ◆ Choose "DL" from the disc selector above the burn button.
 - ◆ Go to **File** --> **Save as Disc Image...**
 - ◆ Enter a name for the image and save it.
2. Burn the Dual-layer Image file to a single layer DVD.
 - ◆ Open Toast (do not open your previous project).
 - ◆ Click the **Copy** tab at the top of the *Toast* window.
 - ◆ Click the **Formats** tab in the left drawer and choose **Image File**.
 - ◆ Choose **Fit-to-DVD video compression**.
 - ◆ Drag your disc image file to the *Content* area.
 - ◆ Insert a blank DVD.
 - ◆ Burn the image to the DVD.
