

"d3dx9 33.dll was not found" when installing Creator 10

- Creator NXT

1. Insert the Easy Media Creator 10 installation disc. If the installation begin automatically, click **Cancel** to close it.

Note: If your Easy Media Creator 10 was a download, make sure the installation file has been extracted to your hard drive (preferably to the desktop so you can find it easily).

2. Go to **My Computer**. Right click on your drive with the installation disc and select **Explore**.

Note: If installation is from a download, right click on the installation folder and select **Explore**.

3. Locate DX9_REDISTS\DirectX9\ folder.

4. Double click on **DXSETUP.EXE** and follow the on-screen instructions to install.

5. When installation is completed, restart your computer.
