

How to Create an AVCHD archive in Creator 2010 2011

- Creator NXT

1. Be sure that you have connected your AVCHD camcorder or device is turned on and attached to your computer.
 2. In *Roxio Home*, select the *Video - Movies* tab and then select **Archive AVCHD**.
 3. In the *AVCHD Archive* window, click on the drop down menu under *From:* to browse for AVCHD content on your AVCHD camcorder or device.
 4. In the *Media Selector* window, select the videos (represented by thumbnails) you want to add to your project and click **OK**.
 5. You can now preview and delete videos under the *Source* pane on the left.
 6. Insert a blank DVD, or if you have a Blu-Ray burner, a Blu-Ray disc.
 7. Click green **Go** button on the lower right to begin burning your project.
