

Error 1603 or Error attempt to read from source install database

- Corel Other

Issue: Error 1603 or "Error attempt to read from source install database" message during installation

Resolution:

- If installing from disc, try copying all files from the disc to a folder on the hard drive then installing from hard drive.
 - If installing from download, delete all files in Temp folder then try again. You can access the Temp folder by going to Start and select Run then type %temp% and click on the OK button or press the Enter key.
-
