

Anti-virus software detects trojan threat in Roxio software

- Corel Other

All Roxio software is thoroughly tested to be virus and trojan free. If an anti-virus software detects Roxio processes as a virus or trojan, you can safely ignore the warning and let a Roxio Customer Care agent know about the issue so we can bring the matter to the anti-virus manufacturer's attention. These messages are usually eliminated in future updates of the anti-virus software.
