

Cineplayer launches when a DVD movie is inserted

- Corel Other

1. Disable DMXlauncher

- Click **Start** --> **Run**(*Search* if you are using Windows Vista).
- Type "msconfig" and click on the **OK** button.
- Select the *Startup* tab over on the right side.
- Uncheck the box next to **DMXlauncher**.
- Click on the **Apply** button and then click on **OK**.
- Click **YES** to restart the computer.
- After rebooting, you may receive a message saying, "You have used the 'System Configuration Utility' to make changes to your system....". If you get this message, simply place a check mark in a box on the lower left side titled, "Do not show me this message again" and click on the **OK** button.

2.Set your desired Autoplay preferences

In Windows XP

- Click **Start** --> **My Computer**.
- Right-click on drive(s) affected select **Properties**.
- Select the *Autoplay* Tab.
- Choose **DVD Movie** from the drop down menu.
- Select *Prompt me each time to choose an action*.
- Click **OK**.

In Windows Vista

- Click **Start** -> **Control Panel**.
- Click **Control Panel Home** in the upper left hand corner.
- Under *Hardware and Sound* select **Play CDs or other media automatically**.
- In the drop down menu marked for *DVD movie* select **Ask me every time**.
- Click **Save**.
