

DVD playback is choppy in Cineplayer

• Corel Other

The minimum tested CPU speed is 466 Mhz. To get maximum CPU performance keep other applications closed when viewing a DVD.

- 1. Make sure you have [[../marketplace.xbox.com/en-US/PC.html|Direct X 9]] installed, and are running the latest [[../windows.microsoft.com/en-US/windows/products/windows-media.html|Windows Media Player]].
- 2. Download the latest certified video card drivers from your video card manufacturer's website.
- Go to My Computer and right click
- Choose **Properties**
- Click on the **Hardware** tab
- Select **Device Manager**
- Double-click **Display Adapters.**
- You're video card make and model is displayed.
- To find out the driver details (such as version), right click on the make and model under **Dispaly adpapter**, and select **Properties**.
- Set your screen resolution to 1024x768, 16 color bit, and a 75 Hz refresh rate.
