

Adding music to a PhotoShow project

- Corel Other

Your PhotoShow will have a default song already added to your Show. The music, and its duration, is represented by a colored box around your photos and will have blue "handles" on each end of the song where you can extend the length of the song or shorten it to the photos you want to pair it with. There is no limit to the amount of songs you can add to a Show.

Note: You must be a PhotoShow Premium subscriber to add your own .MP3 or iTunes .AAC music files to PhotoShow projects.

Adding Music

1. Login to your PhotoShow Premium account or launch the PhotoShow 6 desktop software.
- Add your photos.
 - Click the *2 Personalize* tab, and then click the *Music and Photos* tab.
 - Your show will have default music already added (depending on the theme you chose). If you prefer to use the song for the whole PhotoShow, you can grab the blue "handle" and extend it by dragging it over all of your photos.
 - If you want to add a new song, hover your mouse over the picture where you want the song to start and click the **red music note** in the upper right corner.
 - You have two options to add music:
 - ◆ Select a music genre in the *Categories* list on the left, and then click song under the *Song Title* list on the right. The selected song will automatically play a preview. If you like the song, click **OK**.
 - ◆ Add your own .MP3 or iTunes .AAC file by clicking on **My Music** under the *Categories* window. Browse your computer until you find the song you want and then click **Open**. You can only add one song at a time.
 - The new song now appears as a different color around your photos.
 - Drag the blue handles of each song until you have them matched up to the photos you want the songs to play along to.
 - Click the **Preview** button in the upper left to see how it looks and sounds.
 - Complete customizing your PhotoShow or click **Done** to finish.

Deleting Music

1. Open your PhotoShow.
- Click the *2 Personalize* tab, and then click the *Music and Photos* tab.
 - Hover your mouse over the title of the song and then click the **red "X"** next to it.
