

Rotating video in Easy Media Creator and Videowave.

- Corel Other

1. Launch Easy Media Creator then click on **Home** --> **Application** and select **Videowave** in the main window.
2. Click on **Timeline** under the *Production Editor* window.
3. Go to **Production** --> **Add Color Panel** to put a color panel in the place where you want the video and make it slightly longer than the video.
4. Add the video as an overlay by dragging and dropping it to the overlay track (**OVI 1**) on the timeline
5. Double click on the overlay track and *Settings* window will show up.
6. Select the **Position** button (circle with crosshairs) then move the slider for **Rotation** to rotate the video.
Once the rotation is finished, trim the color panel to fit.
7. Go to **File** --> **Output As...** to save the rotated video file.
