

Changing the frame rate in PhotoShow

- Corel Other

Follow these instructions to adjust the frame rate for the photos in your PhotoShow:

1. Launch PhotoShow.
2. Click the **Manage** button.
3. On the *Manage* screen, find your PhotoShow.
4. Click the **Edit** button to open your PhotoShow in the *Edit* screen.
5. In the *Edit* screen, click the **Playback** tab.
6. Click the **Speed** drop-down menu and select a duration. If you don't see the duration you want listed, choose **Other Time** to specify the duration you want.
