8. NEW! Capture multiple devices and edit them together seamlessly

From capturing to editing, Toast 17's multi-camera solutions have you covered. Connect multiple devices and capture synced video and audio in a single click with MultiCam Capture. View the preview screens for all of your connected devices in one place, including recording your computer screen, and easily adjust the camera's image to calibrate the color and brightness of each feed. With multiple angles recorded, easily edit up to 4 camera angles together with new MultiCam Editing. Select which angle to show as the videos play. Explore a variety of creative options, including picture-in-picture effects, or swiftly switch between camera angles to add interest and draw in viewers. This is the perfect combination to create engaging how-to tutorial videos, unboxing videos, and much more. With multi-camera capture and editing tools, we're bringing you all of the options to create engaging videos to grow your audience!

9. Capture and edit video and audio from anywhere

Now you can capture and edit audio and video from wherever you are! Create engaging how-to content or demonstrations for any audience with simple screen recording software. Then, just record or add your audio and drop in voiceover. Don't let poor audio slow you down either - you can import and convert clips from LPs, tapes, or streaming internet sources; save the sound as a digital file and add it to your library or burn it to disc directly. You can even clean up and enhance recordings with audio filters and import your music to iTunes automatically. If video is your fancy, capture footage right from your screen, a portable device, or the web! Download* and rip content, extract and edit clips from home DVDs, even make quick edits and trim video clips with Toast Slice to remove unwanted segments! Then just export to Toast MyDVD or iMovie for further editing, or to save as a file. There are countless options for capturing, sharing, and saving projects--across formats and devices!

*Does not copy or capture protected or copyrighted content.

10. Convert video to view on your devices & share on your favorite social sites

Easily convert video and audio to popular formats to playback on phones, tablets, game consoles, and other devices with Toast's custom profiles and presets. Schedule video conversion projects to process when you are away from your computer, preview a short clip of your video to check settings, and boost conversion speeds if you have a compatible NVIDIA graphics card. If posting and sharing your video content is your bag, you can do it directly to YouTube, Facebook, or Vimeo and if you're on the go, Toast can automatically tweet your YouTube and Vimeo video links for you! You've created your media, now share it with ease--from your favorite device!

11. Transform your photos into picture-perfect portraits
